

OLTRE

FINITURE MATERICHE TEXTURED FINISHES

Rigorosa nella sua linearità ma ricca nella sua essenza Oltre presenta, finiture particolari ed accessori che la rendono assolutamente unica nel suo genere. I colori ed i materiali sono tanti e studiati per essere abbinati elegantemente insieme, raffinati e pregiati come le ante realizzate con malta stesa a mano, con effetto cemento, oppure in legno impiallacciato dalla forte tattilità. Caratterizzata dalla meticolosa cura del dettaglio e da un'ampia modularità, Oltre diventa protagonista anche nello spazio living e dining con esclusive soluzioni arredative di design.

Oltre offers rigorous lines and a rich essence, with many different finishes, details and accessories that make it unique in its genre. There are many colours and materials available, all designed to blend together elegantly to create a refined and exclusive look, such as doors with cement-effect hand-applied mortar and those with highly tactile wood veneer. Characterised by a meticulous attention to detail and a high level of modularity, Oltre is also a star of the living room and dining area, offering exclusive designer furnishing solutions.

L'ANTA QUADRATA SI ABBINA ALLA GOLA AD "ELLE" PER CREARE LA COLLEZIONE NECK. UN' ANTA PRESENTATA IN UN' AMPIA GAMMA DI COLORI E FINITURE CHE POSSONO PERSONALIZZARE LA GOLA.

THE SQUARE DOOR MATCHES WITH THE "L" FINGER RAIL OPENING TO CREATE THE NECK COLLECTION.

THE DOOR IS PRESENTED ON A WIDE RANGE OF COLOURS AND FINISHES THAT CAN CUSTOMIZE THE FINGER RAIL OPENING.

FENIX NTM™

È un nuovissimo prodotto per l'interior design sviluppato da Arpa Industriale. Prodotto grazie a resine di nuova generazione, questo materiale intelligente si contraddistingue per una superficie dalle proprietà straordinarie. Con una bassa riflessione della luce, la sua superficie è estremamente opaca (valore di riflessione speculare: 1,5 e 60°) e anti impronte digitali. Grazie all'utilizzo della nanotecnologia, eventuali micrograffi possono essere riparati termicamente ed è inoltre piacevolmente soft touch. FENIX NTM™ è Made in Italy. FENIX NTM™ è un materiale innovativo di Arpa Industriale creato per l'interior design prodotto mediante l'applicazione simultanea di calore (circa 150°C) e alta pressione specifica (> 7 MPa) per ottenere un prodotto omogeneo non poroso con densità elevata. Il suo core è composto da carta impregnata in resina termoindurente mentre la superficie decorativa, ottenuta con l'ausilio di nanotecnologie, è costituita da una carta decorativa trattata con resine di nuova generazione frutto della ricerca di Arpa Industriale. FENIX NTM™ è un materiale che si distingue per particolari caratteristiche quali: alta resistenza al graffio e al calore, anti impronta, morbidezza al tatto, bassa riflessione della luce, riparabilità termica dei micrograffi, alta attività di abbattimento della carica batterica. FENIX NTM™ è un marchio registrato da Arpa Industriale. FENIX NTM™ è placcato su truciolare idrorepellente e il top è bordato sui lati a vista con polipropilene spessore 1 mm in tinta.

Technical information

FENIX NTM™

It is a brand new interior design product developed by Arpa Industriale. Using the most modern resins, this intelligent material stands out for the extraordinary characteristics of its surface. The matt surface has an exceptionally low reflectivity (specular reflection index: 1.5 and 60°) and is highly resistant to hand and finger prints. The material uses nanotechnology to enable micro-scratches to be healed thermally, and it also has a very pleasant soft touch effect. FENIX NTM™ is Made in Italy. FENIX NTM™ is an innovative interior design product from Arpa Industriale, made by applying heat (around 150°C) and high pressure (> 7 MPa) to obtain a non-porous very dense material. Its core is composed of paper impregnated with thermosetting resin, while the surface, which employs nanotechnology processes, is composed of a decorative paper treated with the most recently developed resins from the Arpa Industriale research labs. FENIX NTM™ stands out for its exceptional resistance to scratching, heat and hand and finger prints, soft touch, low reflectivity, thermal healing of micro-scratches, and effective anti-bacterial action. FENIX NTM™ is a registered trademark of Arpa Industriale. FENIX NTM™ is fixed on waterproof fiberboard and the top is trimmed on visible sides with 1 mm polypropylene in matching colour.

FENIX NTM™

- 

Resistenza ai graffi e all'abrasione
Resistance to scratches and abrasion
- 

Stabilità dimensionale in presenza di elevata variazione termica
Dimensional stability even at high temperature changes
- 

Alta attività di abbattimento della carica batterica
Enhanced anti-bacterial properties
- 

Resistenza all'urto
Resistance to impact
- 

Igienico
Hygienic
- 

Stabilità alla luce
Lightfastness
- 

Idoneo al contatto con gli alimenti
Suitable for contact with food
- 

Resistenza al calore secco
Resistance to dry heat
- 

Facile da pulire
Easy to clean
- 

Eccellente intensità e profondità del colore
Excellent intensity and colour depth
- 

Antimuffa
Mold-resistant
- 

Resistenza allo strofinamento
Rub resistance
- 

Antistatico
Antistatic
- 

Elevata resistenza a solventi acidi e ai reagenti di uso domestico
High resistance to acid solvents and household reagents
- 

Idrorepellente
Water proof
- 

Autoportante (solo per gli spessori 10 e 12 mm)
Self-supporting (only for 10 and 12 mm)
- 

Bassa riflessione della luce, superficie estremamente opaca
Low light reflection, extremely matt surface
- 

Riparabilità termica dei micrograffi
Repairability thermal micro-scratches
- 

Anti-impronta
Anti-huella digital
- 

Morbidezza al tatto
Soft to the touch

FENIX NTM™

Informazioni tecniche

La malta cementizia è realizzata con impasti derivati da miscele, attentamente studiate, di leganti idraulici ed inerti, a base di farine di quarzo e sabbie minerali a granulometria controllata, esente da sali ed impurezze. A questo formulato viene aggiunta una percentuale (1÷2%) di polimeri elastomerici stabilizzanti, per evitare tensioni o crepe generate da sbalzi di temperatura e sollecitazioni dinamiche particolari. Prima dell'applicazione le superfici vengono trattate per poter permettere l'applicazione del rasante. Quest'ultimo viene applicato rigorosamente a mano da esperti artigiani su pannelli compositi. Sulla superficie, una volta asciutta, vengono applicate più mani di rivestimento acrilico trasparente: questo trattamento protegge la superficie da infiltrazioni di unto e sporco.

La particolarità del prodotto e soprattutto il modo di applicazione, ne determinano un aspetto cementizio con alcune caratteristiche proprie della sua natura, quali piccole imperfezioni, piccoli fori ed angoli non perfettamente squadrati e segni disomogenei della spatola, che esaltano la lavorazione artigianale.

Uso e manutenzione

La collezione è caratterizzata da un'adeguata resistenza alle abrasioni, ai graffi e alle possibili macchie. È comunque molto importante un corretto trattamento e una corretta manutenzione del prodotto.

Per quanto concerne la pulizia delle superfici è indicato l'uso di detergenti neutri diluiti in acqua tiepida (proporzione 1:10, ad esempio 0,1 L di prodotto pulente e 1 L di acqua) e passati con dei semplici panni in microfibra. È consigliato risciacquare i detergenti usati, in quanto si riduce notevolmente il rischio di usura dello strato di rivestimento a protezione della superficie. È altamente sconsigliato l'utilizzo di prodotti concentrati e di sistemi di pulizia a vapore.

Technical Information

Cement mortar is made from pastes derived from carefully blended mixtures of inert hydraulic bonding agents, comprised of quartz and mineral sands with controlled granule sizes free from salts and impurities. This formula is then blended with a percentage (1-2%) of stabilising elastomeric polymers to prevent tensions and cracks caused by temperature changes and dynamic stresses. The surfaces are treated before application to allow the coating to adhere. The coating is then applied by hand by expert craftsmen onto the composite panels. Once dry, the surface is then treated with a transparent acrylic coating: this treatment protects the surface against grease and dirt.

The special qualities of the product, and in particular the application method, create a cement effect that has certain inherent properties, such as small imperfections, tiny holes, and corners that aren't perfectly square. There may also be uneven trowel marks, all of which highlight the craft manufacture.

Use and maintenance

This collection is characterised by good resistance to abrasion, scratches and stains.

It is nonetheless very important to treat and maintain the product correctly.

With regards to cleaning surfaces, we recommend the use of neutral detergents diluted in tepid water (dilution 1:10, e.g. 0.1 L of cleaning product in 1 L of water) applied using a micro-fibre cloth.

We recommend rinsing off any detergents used as this considerably reduces the wear on the coating protecting the surface. The use of concentrated cleaning products and steam cleaning systems should be strictly avoided.

VERTICAL OPENING

ESTREMAMENTE FACILE DA UTILIZZARE

EXTREMELY EASY TO USE

OLTRE

Grazie a **SERVO-DRIVE** basta una leggera pressione sul fronte con la mano o il gomito per aprire automaticamente le ante a ribalta.

Persino i frontali grandi e pesanti si aprono verso l'alto come in totale assenza di gravità. Inoltre, l'utilizzatore della cucina può godere di un accesso ottimale all'interno del mobile.

Thanks to **SERVO-DRIVE**, just apply light pressure to the front panel with the hand or elbow to automatically open the folding doors.

Even large front panels open upwards with a complete lack of gravity. In addition, the opening provides optimum access to the cabinet interior.

Chiusura comoda e semplice, assicurata dall'interruttore facilmente raggiungibile, montato sul fianco del corpo mobile.

Le chiusure delle ante a ribalta risulta così estremamente comoda ed ergonomica, mentre la rinomata funzione **BLUMOTION** garantisce una chiusura dolce e silenziosa.

Simple and comfortable closure by using an easy-to-reach switch fitted on the side of the cabinet.

Closing the folding doors is so easy, comfortable and ergonomic. The renowned **BLUMOTION** function also ensures gentle and silent closing.

KIT TRASFORMATORE

POWER SUPPLY KIT

COMPOSITION "B"

APERTURA VERTICALE OBLIQUA

I pensili con questo tipo di meccanismo necessitano per l'apertura di poco spazio libero sopra il mobile grazie al movimento basculante dell'anta che si apre senza difficoltà applicando poca forza anche in presenza di frontali pesanti. Con l'arresto progressivo le ante si fermano in qualsiasi posizione; in questo modo la maniglia è sempre facilmente raggiungibile. La chiusura è ammortizzata ed è possibile regolare la forza di tenuta in base al peso del frontale.

VERTICAL OPENING OBLIQUE

Wall units that mount this type of mechanism require little clearance above the cabinet thanks to the swivelling movement of the door that can be easily opened by applying slight pressure, even with heavy fronts. The doors stop in any position thanks to the gradual stopping movement; in this way, the handle is always easily accessible. The closing movement is cushioned and the closing force can be adjusted according to the weight of the front door.

	A	B	C	D
H 60	18	9,6	46,5	53,5
H 72	18	9,6	57	61

APERTURA VERTICALE

L'anta ad apertura verticale, potendo essere sollevata completamente verso l'alto, consente un accesso totale all'interno del pensile. Ideale per l'impiego in mobili a colonna per nascondere ad esempio apparecchi elettrici, o pensili con corpi mobili sovrastanti, ha la chiusura ammortizzata e la possibilità di regolare la forza di tenuta in base al peso del frontale.

VERTICAL OPENING

Doors with vertical opening movement can be fully raised to fully access the inside of the wall unit.

Ideal for use on column units to conceal electrical appliances for examples, or on wall units surmounted by mobile units.

The closing movement is cushioned and the closing force can be adjusted according to the weight of the front door.

PENSILE CON APERTURA ANTE A PACCHETTO

Il meccanismo d'apertura ante a pacchetto è idoneo sul pensile H 72; la regolazione della forza di apertura può essere impostata in modo esatto in base ai pesi dei frontali, la chiusura è ammortizzata e la cerniera centrale clip si contraddistingue per l'innovativa tecnologia che garantisce la sicurezza per le dita.

WALL UNIT WITH LIFT-UP FOLDING DOORS

The lift-up folding door opening mechanism is suitable for wall units with H 72; the opening force can be adjusted precisely according to the weight of the fronts, while the closing movement is cushioned and the central clip-on hinge features innovative technology for safeguarding the fingers.

**SCHEMA MONTAGGIO
LIMITATORE
LIMITER INSTALLATION
DIAGRAM**

Per evitare l'interferenza dell'anta in fase di apertura con cornici o mensole, si può richiedere il limitatore dell'angolo di apertura cod. 5620005

In order to avoid that the door interferes with cornices or shelves during the opening movement, it is possible to request an opening angle limiter: code 5620005

PENSILE CON APERTURA A RIBALTA

Le ante aprendosi verso l'alto consentono di avere un' ampia visione d'insieme all'interno del mobile. In questo modo è possibile un comodo accesso agli oggetti contenuti al suo interno e, dal punto di vista ergonomico, molto vantaggioso. La regolazione della forza di apertura può essere impostata in modo esatto in base al peso del frontale. Grazie all'arresto progressivo le ante si fermano in qualsiasi posizione; in questo modo la maniglia è sempre facilmente raggiungibile. La chiusura è ammortizzata e un'unica manovra è sufficiente per regolare il frontale tridimensionalmente grazie all'assenza di cerniere e al sistema di aggancio clip.

WALL UNIT WITH FLAP DOOR

The doors that open upwards guarantee ample overall visibility inside the cabinet. In this way, all objects housed inside the cabinet can be comfortably accessed, making the system highly advantageous from an ergonomic perspective. The opening force can be adjusted precisely according to the weight of the front. The doors stop in any position thanks to the gradual stopping movement; in this way, the handle is always easily accessible. The closing movement is cushioned and a single manoeuvre is required to three-dimensionally adjust the front, thanks to the clip-on system and the absence of hinges.

Informazioni tecniche

FENIX NTM™

È un nuovissimo prodotto per l'interior design sviluppato da Arpa Industriale. Prodotto grazie a resine di nuova generazione, questo materiale intelligente si contraddistingue per una superficie dalle proprietà straordinarie. Con una bassa riflessione della luce, la sua superficie è estremamente opaca (valore di riflessione speculare: 1,5 e 60°) e anti impronte digitali. Grazie all'utilizzo della nanotecnologia, eventuali micrograffi possono essere riparati termicamente ed è inoltre piacevolmente soft touch. FENIX NTM™ è Made in Italy. FENIX NTM™ è un materiale innovativo di Arpa Industriale creato per l'interior design prodotto mediante l'applicazione simultanea di calore (circa 150°C) e alta pressione specifica (> 7 MPa) per ottenere un prodotto omogeneo non poroso con densità elevata. Il suo core è composto da carta impregnata in resina termoindurente mentre la superficie decorativa, ottenuta con l'ausilio di nanotecnologie, è costituita da una carta decorativa trattata con resine di nuova generazione frutto della ricerca di Arpa Industriale. FENIX NTM™ è un materiale che si distingue per particolari caratteristiche quali: alta resistenza al graffio e al calore, anti impronta, morbidezza al tatto, bassa riflessione della luce, riparabilità termica dei micrograffi, alta attività di abbattimento della carica batterica. FENIX NTM™ è un marchio registrato da Arpa Industriale. FENIX NTM™ è placcato su truciolare idrorepellente e il top è bordato sui lati a vista con polipropilene spessore 1 mm in tinta.

Technical information

FENIX NTM™

It is a brand new interior design product developed by Arpa Industriale. Using the most modern resins, this intelligent material stands out for the extraordinary characteristics of its surface. The matt surface has an exceptionally low reflectivity (specular reflection index: 1.5 and 60°) and is highly resistant to hand and finger prints. The material uses nanotechnology to enable micro-scratches to be healed thermally, and it also has a very pleasant soft touch effect. FENIX NTM™ is Made in Italy. FENIX NTM™ is an innovative interior design product from Arpa Industriale, made by applying heat (around 150°C) and high pressure (> 7 MPa) to obtain a non-porous very dense material. Its core is composed of paper impregnated with thermosetting resin, while the surface, which employs nanotechnology processes, is composed of a decorative paper treated with the most recently developed resins from the Arpa Industriale research labs. FENIX NTM™ stands out for its exceptional resistance to scratching, heat and hand and finger prints, soft touch, low reflectivity, thermal healing of micro-scratches, and effective anti-bacterial action. FENIX NTM™ is a registered trademark of Arpa Industriale. FENIX NTM™ is fixed on waterproof fiberboard and the top is trimmed on visible sides with 1 mm polypropylene in matching colour.

FENIX NTM™

- 

Resistenza ai graffi e all'abrasione
Resistance to scratches and abrasion
- 

Stabilità dimensionale in presenza di elevata variazione termica
Dimensional stability even at high temperature changes
- 

Alta attività di abbattimento della carica batterica
Enhanced anti-bacterial properties
- 

Resistenza all'urto
Resistance to impact
- 

Igienico
Hygienic
- 

Stabilità alla luce
Lightfastness
- 

Idoneo al contatto con gli alimenti
Suitable for contact with food
- 

Resistenza al calore secco
Resistance to dry heat
- 

Facile da pulire
Easy to clean
- 

Eccellente intensità e profondità del colore
Excellent intensity and colour depth
- 

Antimuffa
Mold-resistant
- 

Resistenza allo strofinamento
Rub resistance
- 

Antistatico
Antistatic
- 

Elevata resistenza a solventi acidi e ai reagenti di uso domestico
High resistance to acid solvents and household reagents
- 

Idrorepellente
Water proof
- 

Autoportante (solo per gli spessori 10 e 12 mm)
Self-supporting (only for 10 and 12 mm)
- 

Bassa riflessione della luce, superficie estremamente opaca
Low light reflection, extremely matt surface
- 

Riparabilità termica dei micrograffi
Repairability thermal micro-scratches
- 

Anti-impronta
Anti-huella digital
- 

Morbidezza al tatto
Soft to the touch

LA COLLEZIONE HI-LINE
RIVOLUZIONA IL CONCETTO DEI
MATERIALI E DEI COMPLEMENTI CHE
COSTITUISCONO UNA CUCINA.
ELEMENTI IN ALLUMINIO, ANTE AD
EFFETTO METALLO, ACCESSORI DAL
DESIGN UNICO, APPOSITAMENTE CREATI
PER ESALTARE IL PROGRAMMA OLTRE.

THE HI-LINE COLLECTION CHANGES THE CONCEPT
OF MATERIALS AND ACCESSORIES THAT MAKES UP A KITCHEN.
ALUMINIUM ELEMENTS, DOORS FINISHES WITH METAL
EFFECT AND ACCESSORIES WITH A UNIQUE DESIGN, HAVE BEEN
CREATED TO ENHANCE THE OLTRE PROGRAM.

OLTRE

CARATTERISTICHE TECNICHE

ANTE E FRONTALI CASSETTI

anta sp.22 mm composta da un telaio di alluminio estruso dove viene alloggiata sul fronte una lamina imbutita e sul retro un pannello di tamponamento entrambi in alluminio.
Tra le due lamiere nell'intercapedine viene inserito un materiale con proprietà fonoassorbenti e termoisolanti capaci di rendere l'anta consistente pur mantenendo la sua leggerezza.
L'anta Hi-line forte del proprio design è interamente riciclabile.
La finitura dell'anta viene realizzata con un unico bagno anodico nei colori: nero (opz.AL11) e titanio (opz.AL12)

MANIGLIE

AL11 finitura nera passo mm 192
AL12 finitura titanio passo mm 192

TECHNICAL FEATURES

DOORS AND DRAWER FRONTS

Th. mm 22 door composed by an extruded aluminum frame. In the front side of the door is placed an aluminum deep-drawn foil and on the back side an aluminum filler panel.
In the gap between the two sheets it is inserted a material with sound-absorbing and heat-insulating properties, that can make the door more consistent, without modify its lightweight.
The Hi-line door is completely recyclable.
The door finish is realized with a single anodic bath in the colors: black (opt.AL11) and titanium (opt.AL12)

HANDLES

AL11 black finish centre-to-centre distance 192 mm
AL12 titanium finish centre-to-centre distance 192 mm

Note: no handle opening available

VIVI IL LIVING

LIVE THE LIVING

Vasta gamma di soluzioni e totale modularità per creare nuove composizioni living adatte ad ogni spazio.

Wide range of solutions and totaly of modules to create new lively furnishing compositions suitable for every kind of space.

LIBRERIA LIVING

LIVING BOOKCASE

La libreria va ad ampliare la gamma living con spessore e carattere. La sua struttura sp.2,5 è perfettamente coordinata alla cucina grazie alla possibilità di integrare le ante del programma Oltre.

N.B.: per una corretta preventivazione ed ordine delle librerie, si consiglia l'uso del programma 3cad Evolution

The bookcase expands the living range with substance and character. His th. 2,5 structure is perfectly coordinated with the kitchen, thanks to the possibility to integrate the door finishes of Oltre program.

Note: we recommend to use the 3cad Evolution software, for having a correct estimate and order.
